Date 29 March 2016  
Subject Electronic parking disk

Dears Mr. Kroll,

Hereby I confirm that the electronic parking disc developed by the Danish company Needit is allowed in the Netherlands under EU arrangements, provided that the provisions of Article 25 of the Dutch Road Traffic Signs and Regulations have been met.

On the basis of your demonstration of this disk, we have concluded that there is no conflict with article 25.

I hope this answer is of sufficient help to you.

Yours sincerely,

DIRECTOR OF ROADS AND ROAD SAFETY

Mrs. drs. M. Sonnema
